

CASE MANAGEMENT PROFILE

LAURA MORA MSc. Psych. **INTERNATIONAL SENIOR CASE MANAGER**

Laura is one of our most experienced Case Managers, with over 7 years of experienced in the field. She joined Brain Injury Services back in 2011, and since then, she has worked tirelessly to achieve the best outcomes with all her cases. She has had cases covering a wide spectrum of injuries and needs, from cerebral palsy to severe traumatic brain injuries. She has also worked with patients in different countries, as she is able to speak English, Spanish and Italian.

She qualified as a Psychologist back in 2008. Since then, she has continued progressing in her education, and in particular in the brain injured field. She holds a Postgraduate qualification in Neuropsychology and is about to complete her PhD in Psychology, and has collaborated with institutions and universities in Spain and Italy. She has published different articles in scientific journals and uses her knowledge to apply it to her work with brain injured individuals. Laura currently teaches at Goldsmiths University and the Open University as associate lecturer.

Before joining our team, she worked in different organisations always supporting individuals. She has worked with different disabilities, such as Autism and Cerebral Palsy, and spent over a year working in a special needs school as a therapist. These experiences have given Laura a good overview of client's needs, and also particular specialised skills for individuals' assessments. Moreover, her clinical knowledge allows her to provide an exclusive and comprehensive insight into the cognitive, behavioural and mental health challenges that people with brain injuries present, this enables her to undertake thorough assessments, preparing comprehensive reports based upon clinical evidence and objective observations.

Laura is effective in organising and establishing individual rehabilitation regimes, supervising and coordinating teams within a multidisciplinary and goal orientated way. She promotes communication within teams and focuses on efficiency and cost effectiveness, bringing valuable and measurable outcomes to case management planning and implementation. She is client focussed, and aims to provide measurable data to rehabilitation practice, that helps assessing recovery.

Laura is skilled in managing and coordinating multidisciplinary therapy teams, writing individual rehabilitation plans, risk assessments, participating in regular meetings and writing review reports. She was the lead therapist for a number of teams in the past, training individuals and being responsible for their clinical supervisions and development.

Laura has had large cases both with children and adults and has long standing record of good practice. She is particularly keen in helping and supporting families and brain injured survivors going through their rehabilitation process, whilst fostering close and trustworthy relationships.
